PROFESSIONAL SUMMARY

Computer Science student at BINUS University with a background in Multimedia and a self-taught journey in programming. My interest in programming began after being introduced to C++ in high school, motivating me to independently explore software development beyond the classroom. Experienced in software development projects, laboratory assistance, and collaborative technology competitions. As a Part-Time Laboratory Assistant, I developed communication, public speaking, teaching, and teamwork skills while assisting students, including those from higher semesters. Continuously seeking opportunities to learn, build, and solve real world problems through technology.

EXPERIENCE

Part-Time Laboratory Assistant

BINUS University

August 2025 – August 2026

- Selected as a **Part-Time Laboratory**, taking responsibility for teaching and assisting students in laboratory sessions and supporting their learning process.
- Taught and communicated technical concepts to students, including students from **higher semesters**, strengthening public speaking, communication, teaching, and interpersonal skills.
- Worked closely with fellow Laboratory Assistants and lecturers, building collaborative relationships across different academic levels.
- Developed greater confidence in communicating technical concepts and interacting with diverse groups of students and academic staff.
- Built a strong peer network through the Laboratory Assistant community, which later enabled collaboration on technology competitions and project development.

BINUS IT Division Selection

BINUS University

September 2024 – February 2026

- Competed against approximately **644 applicants** and progressed to the **final interview stage among approximately 20 remaining candidates**.
- Completed technical training covering **HTML, CSS, JavaScript, TypeScript, C#, ASP.NET, Express JS, React and React Native**.
- Developed technical projects as part of the selection and training process while learning to work effectively within a team.

COMPETITIONS

Gunadarma Codeweek

Hacker (Technology & Implementation)

- Conceptualized **TokoCerdas**, an AI-powered voice-driven Order Management System designed to help MSMEs generate marketing content and manage inventory across multiple marketplaces.
- Compared and evaluated development tools and LLM models based on project requirements, technical capabilities, and budget constraints to determine the most suitable technology stack.
- Collaborated with the team to develop the solution during the competition's ideation stage.

Samsung Solve For Tomorrow

IOT Architect

- Conceptualized **STEPWISE**, a self charging IoT smart insole and wearable pod designed to provide personalized biomechanical feedback for novice runners.
- Designed the hardware architecture using **ESP32-C3, FSR sensors, MPU6050, and PVDF-based energy harvesting**.
- Collaborated with the team to develop and iterate on the proposal, advancing to the proposal refinement stage.

EDUCATION

Bachelor of Computer Science

BINUS University – Alam Sutera

GPA : 3.63

Expected Graduation : 2028

SKILLS

- **Programming:** C, C++, C#, Python, Java, PHP, JavaScript, TypeScript
- **Web & Application Development:** HTML, CSS, ASP.NET, Express.js, React, React Native
- **Software Engineering:** REST API, Microservices, Git, Docker, Database / MySQL
- **Tools & Technologies:** Node.js, Prisma, Flutter, Figma
- **Other:** Problem Solving, Team Collaboration, Technical Communication, Teaching & Mentoring
- **Languages:** Indonesian, English
